KIRSTEN CURRIE

DATA ANALYST | STRATEGY & ANALYTICS

(760) 828-0882 | kirstenlynncurrie@gmail.com | linkedin.com/in/kirstencurrie | kirstencurrie.github.io

PROFILE

Data analyst with experience identifying business opportunities, designing experiments, and translating complex data into clear recommendations for cross-functional stakeholders. Proven ability to tackle open-ended problems — from surfacing hidden revenue drivers to building reporting solutions that inform strategic decisions. Known for delivering analyses that stakeholders find genuinely clear and actionable, and for being sought out by teams to collaborate on high-priority projects.

EXPERIENCE

Ecommerce Data Analyst May 2025 – Present

Kontoor Brands, Inc. (Wrangler, Lee) | Greensboro, NC

- Proactively identified an untracked AI-driven traffic source in GA4 generating $250K+ in revenue impact — capturing and classifying it using pattern-based filtering and integrating it into Power BI reporting for executive visibility.
- Regularly present consumer and product analyses — including cohort, retention, consumer segmentation, clickstream behavior, and purchase pattern studies — to cross-functional stakeholders, consistently receiving recognition for communicating complex findings clearly and accessibly.
- Sought out by stakeholders across teams to lead and contribute to high-priority analytical projects, reflecting trust built through consistent delivery and insight quality.
- Identified and resolved a DAX formula causing widespread report slowdowns and crashes, restoring performance across multiple dashboards and eliminating significant wait time for teams relying on daily reporting.
- Conducted customer lifecycle and churn analysis identifying a 70%+ churn rate following a discontinued product line, translating findings into strategic recommendations including CRM reactivation and product bundling.
- Designed and evaluated controlled A/B experiments across onsite merchandising and promotions, applying hypothesis testing and lift analysis to generate data-driven optimization recommendations.
- Integrated loyalty survey and transactional data to identify high-value and under-penetrated customer segments, informing cross-functional targeting and merchandising decisions.
- Applied correlation analysis and regression-based modeling prep to evaluate behavioral and revenue trends, supporting early-stage promotional forecasting.

Manager, Material Development & Analyst Jun 2022 – Mar 2025

Adidas Golf | Carlsbad, CA

- Led reporting and analysis of product and material performance across $200M+ in annual revenue, informing sourcing, margin optimization, and seasonal assortment decisions.
- Drove proprietary fabric innovations (Twistweave™, Twistknit™), contributing to a 66.7% gross margin improvement across the Men's ULT365+ range.

Material Developer, US Team Sports Apparel Jul 2019 – Jun 2021

Adidas | Portland, OR

- Identified $40K+ in cost savings through material utilization analysis; increased recycled content to 70% within one season through supplier and sustainability data analysis.

Women's Intimates & Youth Designer Feb 2018 – Mar 2019

Nordstrom | Seattle, WA

- Owned private label product lifecycle and presented seasonal assortments to buyers; built Excel dashboards for material performance analysis driving supplier cost reductions.
