

KIRSTEN CURRIE

DATA ANALYST & AI AUTOMATION ENGINEER

(760) 828-0882 | kirstenlynncurrie@gmail.com | linkedin.com/in/kirstencurrie | kirstencurrie.github.io

PROFILE

Analytics and automation professional with experience building self-service reporting, AI-assisted workflows, and customer behavior insights that drive business decisions. Brings a unique blend of product development and data analytics expertise, with a proven ability to rapidly adopt new technologies and translate complex business challenges into scalable solutions.

SKILLS

AI & Automation: Microsoft Copilot · ChatGPT · Claude · Prompt Engineering · Power Automate · Power Apps · Python

Data & BI: SQL (PostgreSQL) · Power BI (DAX, Power Query) · Tableau · Excel · GA4

Analytics: Product & Customer Analytics · A/B Testing · Forecasting · KPI Development · Cohort & Funnel Analysis

Professional: Cross-Functional Collaboration · Dashboard Development · Business Process Improvement · Executive Communication · Data Storytelling · Requirements Gathering

EXPERIENCE

Ecommerce Data Analyst

May 2025 – Present

Kontoor Brands, Inc. (Wrangler, Lee) | Greensboro, NC

- Engineered a **self-service forecasting application** using **regression modeling**, Power Apps, and Power Automate, enabling business partners to model promotional scenarios without analyst intervention.
- Built automated Power BI dashboards and KPI reporting used by ecommerce leadership to monitor performance and accelerate decision-making.
- Leveraged Microsoft Copilot and LLMs** to accelerate Python development and automate analytical workflows.
- Investigated customer behavior, revenue trends, and product cannibalization to identify drivers of category performance.
- Analyzed GA4 and Salesforce Commerce Cloud data to identify acquisition, conversion, and retention opportunities.
- Designed** and evaluated onsite **A/B experiments**, including an **affinity-based cart recommendation** test that generated approximately **€100K in incremental promotional** revenue while informing future personalization strategy.
- Combined loyalty and transactional data to identify high-value customer segments and merchandising opportunities.
- Identified a 70%+ churn rate** following product discontinuation, leading to CRM re-engagement & bundling suggestions.

Manager, Material Development & Analyst

Jun 2022 – Mar 2025

Adidas Golf | Carlsbad, CA

- Led development, reporting, and analysis of product and material performance **across \$200M+ in annual revenue**, informing sourcing, margin optimization, and seasonal assortment decisions.
- Drove proprietary fabric innovations (Twistweave™, Twistknit™), **contributing to a 66.7% gross margin** improvement across the Men's ULT365+ range.

Material Developer, US Team Sports Apparel

Jul 2019 – Jun 2021

Adidas | Portland, OR

- Identified \$40K+ in cost savings** through material utilization analysis; increased recycled content to 70% within one season through supplier and sustainability data analysis.

Women's Intimates & Youth Designer

Feb 2018 – Mar 2019

Nordstrom | Seattle, WA

- Owned private label product lifecycle and presented seasonal assortments to buyers; built Excel dashboards for material performance analysis driving supplier cost reductions.

EDUCATION

Associate AI Engineer for Developers (In Progress) – DataCamp, Expected Completion: Fall 2026

Data Analytics Professional Certificate — CareerFoundry, 2024–2025

B.S. Family & Consumer Sciences — University of Idaho

AI PROJECTS

Custom Stable Diffusion Fine-Tuning

Oct 2022

- Fine-tuned Stable Diffusion on a custom illustration dataset to reproduce a personal artistic style.
- Applied dataset preparation, prompt engineering, and model inference to build a customized generative AI workflow.
