

KIRSTEN CURRIE

DATA ANALYST

(760) 828-0882 | kirstenlynncurrie@gmail.com | linkedin.com/in/kirstencurrie | kirstencurrie.github.io

PROFILE

Data Analyst with experience transforming ecommerce customer behavior into actionable product and business insights. Skilled at partnering with product, marketing, merchandising, and executive stakeholders to uncover trends, build scalable BI dashboards, define KPIs, and evaluate experiments that improve customer experience and revenue. Combines strong analytical skills with a background in consumer products and retail, bringing both technical rigor and business intuition to data-driven decision making.

SKILLS

Analytics: Product Analytics · Customer Behavior Analysis · A/B Testing & Experimentation · KPI Development & Measurement · Cohort & Segmentation Analysis · Funnel Analysis · Forecasting & Regression Modeling

Tools: SQL (PostgreSQL) · Power BI (DAX, Power Query) · Tableau · Looker · Snowflake · Python · GA4 · Excel

Professional: Cross-functional Partnership · Dashboard Development · Data Storytelling · Requirements Gathering · Business Problem Solving · Executive Communication

EXPERIENCE

Ecommerce Data Analyst

May 2025 – Present

Kontoor Brands, Inc. (Wrangler, Lee) | Greensboro, NC

- Analyzed customer behavior across GA4 and SFCC Snowflake data to uncover trends in acquisition, conversion, and retention, partnering with marketing, merchandising, and ecommerce teams to guide business strategy.
- Designed and evaluated **onsite A/B experiments**, including an affinity-based cart recommendation test that generated approximately **€100K in incremental promotional revenue** while informing future personalization strategy.
- Built and maintained executive Power BI dashboards, weekly scorecards, funnel reporting, and self-service KPI reporting used across ecommerce leadership to monitor business performance and accelerate decision-making.
- Developed a revenue forecasting model** using millions of promotional, marketing, and sales records, achieving approximately **11% MAPE** and enabling business partners to model promotional scenarios through a self-service planning tool.
- Investigated changes in product and category performance by identifying customer behavior patterns, revenue trends, and product cannibalization, helping teams understand the drivers behind business performance.
- Combined loyalty survey and transactional data to identify high-value customer segments and growth opportunities, providing merchandising teams with insights to improve assortment and targeting strategies.
- Performed **customer lifecycle analysis that identified a 70%+ churn rate** following the discontinuation of a product line, leading to recommendations for CRM re-engagement and product bundling opportunities to improve customer retention.
- Partnered with ecommerce stakeholders to translate business questions into scalable reporting solutions, defining KPIs and building dashboards that enabled teams to independently monitor performance and identify opportunities.

Manager, Material Development & Analyst

Jun 2022 – Mar 2025

Adidas Golf | Carlsbad, CA

- Led development, reporting, and analysis of product and material performance **across \$200M+ in annual revenue**, informing sourcing, margin optimization, and seasonal assortment decisions.
- Drove proprietary fabric innovations (Twistweave™, Twistknit™), **contributing to a 66.7% gross margin** improvement across the Men's ULT365+ range.

Material Developer, US Team Sports Apparel

Jul 2019 – Jun 2021

Adidas | Portland, OR

- Identified \$40K+ in cost savings** through material utilization analysis; increased recycled content to 70% within one season through supplier and sustainability data analysis.

Women's Intimates & Youth Designer

Feb 2018 – Mar 2019

Nordstrom | Seattle, WA

- Owned private label product lifecycle and presented seasonal assortments to buyers; built Excel dashboards for material performance analysis driving supplier cost reductions.
